Peter L. Mansmann, Esq. of Precise, Inc.

Peter Mansmann, Esq. founded Precise, Inc. in 2000, and spent his initial years with the company as a trial consultant. Through this early role, Pete recognized the impact electronic discovery was having on the legal community; in response, he established and currently oversees the dynamic Database/E-Discovery division of Precise. By keeping up with evolving federal rules about e-discovery, Pete leads the department in providing an extremely capable resource for clients facing a case with small or vast amounts of Electronically Stored Information (ESI) involved.

David A. Scotti, Esq. of Hergenroeder, Rega, Kennedy & Scotti LLP

With over 21 years' experience in construction law, Dave focuses his practice on construction litigation, construction contracts and project counseling. He has represented owners, developers, architects, engineers, contractors and subcontractors in construction-related matters—including those involving delay, disruption, extras, cost overruns, design and construction defects, differing site conditions, bid disputes, payment and mechanic's liens. He also has extensive experience in design and construction contract drafting, negotiation and project counseling regarding risk management.

- Contract Development
- Project Controls
- Internal Document Management
- Web-based External Collaboration

Why PRM team?

We observe.

We see the challenges our clients in the architecture, engineering and construction industry face.

We know.

Our combined experience has shown us that anticipating and mitigating risk exposure proactively reduces costs, increases efficiency and sets up a project for success.

We deliver.

We'll work with you and your project team so you will benefit from our expertise and innovation in contract development, project controls, internal document management and Web-based external collaboration.

Benefit from our advice.

As a group of architecture, engineering and construction project experts, we'll help your project team build a foundation for success—from contracts through closeout.

Contract Development

- Assess and analyze risk
- Mitigate exposure proactively
- Draft and negotiate contracts
- Implement policies and procedures
- Create a contract user's guide
- Consult with a Project Advocate
- Protect stakeholder interests

Internal Document Management

- Capture your organization's data
- Filter and de-duplicate internal data based on custom requirements
- Review electronic information
- Undergo on-site collection of Electronically Stored Information (ESI)

Project Controls

- Forecast project developments
- Develop comprehensive and coordinated review-and-approval processes
- Collect and review project data
- Maintain accurate and up-to-date project information

Web-based External Collaboration

- Connect all project participants online
- Streamline reviews-and-approvals
- Share project data securely
- Protect private information
- Audit and archive automatically
- Rely on smooth interoperability
